Two persons without bath \$7.00 per day.

Twin beds und bath \$9.00 per day.

# Why Jasper?

We haven't got the biggest or the most fish. Although last year we caught about 23,000 and our biggest Rainbow was 7½ lbs., we wouldn't guarantee fish to anybody. But where else can you get all this?

- 1: Your choice of 34 streams and 50 lakes to fish, in a Park of 4,200 square miles of unspoiled mountains.
- 2: Your choice of waters near the auto roads, which last year yielded Rainbow over 6 lbs., or remote spots accessible only by horse pack trips where trout are unafraid.
- 3: Your choice of 6 varieties of trout, plus Northern Pike, Arctic Grayling and Rocky Mountain Whitefish.
- 4: Your choice of accommodations: the luxurious Jasper Park Lodge, hotels, cabins or your own camp outfit.
- 5: Icy cold water in June and July when other areas are in the "doldrums."
- 6: Plenty of recreation for the non-fishers in your party: golf, tennis, swimming, horseback riding, hiking, scenic trips, photography, movies and dances.
- 7: Long Northern days that give you almost 20 hours of daylight (in June). You can fish for eight hours and still have over eight hours light each day for other activities.
- 8: Fishing in a scenic surrounding that often makes you forget to watch your fly.
- 9: Costs dictated only by your own desires. For a couple of dollars you can fish all summer. Our trout are not influenced by the size of your pocketbook.
- 10: Just to reach Jasper and return home again gives you a trip you'll never forget.

---

## WANT MORE FACTS?

Just write Sandy Scott at Box 100, Jasper Alberta, Canada, for any more information you wish about this area. Please ask specific questions.

## ◆ CLIMATE

Jasper National Park is situated in a dry belt in the Rockies, with an average annual precipitation (rain and snow) of only 13.06 inches. Although completely surrounded by mountains, the town-site elevation is only 3,472 feet above sea level.

It is noted for the evenness of its temperatures from May until October. June is only four degrees cooler than August.

Days are long throughout the summer. On June 15, there are seventeen hours between sunrise and sunset and almost twenty hours of daylight.

### Average Rainfall Meteorological

June .....	1.69 inches
July .....	1.87 inches
August .....	1.85 inches
September .....	1.39 inches

### Average Mean Temperature

June .....	55 degrees
July .....	60 degrees
August .....	57 degrees
September .....	50 degrees

### Average High Temperature

June .....	67 degrees
July .....	74 degrees
August .....	72 degrees
September .....	63 degrees

## ◆ DAYLIGHT HOURS Meteorological

Angling is permitted from one hour before sunrise to two hours after sunset. This means you may fish during the following hours:

MAY 15 .....	3:56 a.m. to 10:41 p.m.
JUNE 1 .....	3:33 a.m. to 11:07 p.m.
JUNE 15 .....	3:25 a.m. to 11:20 p.m.
JULY 1 .....	3:30 a.m. to 11:21 p.m.
JULY 15 .....	3:46 a.m. to 11:09 p.m.
AUGUST 1 .....	4:08 a.m. to 10:48 p.m.
AUGUST 15 .....	4:32 a.m. to 9:46 p.m.
SEPTEMBER 1 ..	5:24 a.m. to 9:10 p.m.

## ◆ SEASONS

Fishing seasons in Jasper Park open by areas, not by species. This varies from May to October, with practically all areas open in June, July, August and September. In May inquire on your arrival about open streams and lakes.

EASTERN BROOK FROM VALLEY OF FIVE

## ◆ REGULATIONS

Fishing regulations for Jasper National Park are constantly being revised, chiefly in regard to size of limit catches and seasons on certain waters. When you get your license, ask for a copy of the regulations and study it. Following are a few of the important items:

All adult anglers must buy a special fishing license good in all Mountain National Parks, but visitors pay no more than locals.

No size limit but all fish caught must be kept.

Possession of live fish eggs or minnows, whether preserved, frozen or dead, prohibited.

No phosphorescent or illuminated baits permitted.

No more than two single or two gang hooks permitted on a lure.

No more than two flies on a line.

Set lines and lines tied to a boat are prohibited.

## ◆ FISHING TACKLE

Bring your usual fishing tackle with you because there are all forms of fishing in Jasper. Most successful methods are fly and spinning.

All flies, lures, etc., proven successful in the Park are available in Jasper. At our Fishing Headquarters, we maintain the biggest display of trout tackle in Western Canada (115 different kinds of flies, all sizes and colours of plugs and effective spinning lures, eight kinds of spinning reels from Canadian, English, French, Japanese and U.S. manufacturers). You will get more for your fishing tackle money in Jasper.

If you haven't got your fishing rod with you, we can rent you fly, spinning or trolling outfits by the day.

**Fishing Tackle is Sold in Jasper by :**

Fishing Headquarters (Sandy Scott).  
Signal Service & Sports Shop  
Raeside Hardware & Electric (Jack Raeside).

## ◆ ROWBOATS FOR HIRE

There are rowboats for anglers on most accessible lakes in Jasper Park. However arrangements for most of them must be made in the town of Jasper and it is certainly wise to inquire before you plan a fishing expedition. Outboard motors are permitted only on Pyramid, Medicine and Maligne Lakes.

As no one operator maintains boats on all the lakes, and on the most popular lakes such as Beaver, Caledonia, Celestine, Edith, Medicine and Patricia, several operators maintain boats, we act as a clearing house and will be glad to make arrangements on any lake you prefer.

RAINBOW TROUT FROM CELESTINE LAKE

## ◆ TACTICS

Tactics are more important than tackle. For this reason, fish the method you know best and use the lures you have found successful other places. Actually, biggest individual catches of trout in Jasper are made by fly fishermen and we think they have the most fun. However, the largest total catch goes to the natural bait fishermen. Bait casting and spin casting are good for Eastern Brook Trout and Northern Pike but rate a poor third for Rainbow. Use prepared salmon eggs for still fishing. Remember that it is not what you use but the way that you use it that catches fish.

## ◆ LURES

Watching thousands of fishermen try their favorite lures in Jasper, we find that a small handful of flies, spinners, spoons, plugs and bait attract over 80% of the fish. Each angler develops a special skill with his preferred lure and is usually less adept with other lures which might be intrinsically just as effective. Of the hundreds of new designs on the market each year, we are lucky to find one new fly, spoon or plug which consistently produces. If it is good, it is available in Jasper. Natural baits used in Jasper include grasshoppers, worms, beef, salmon belly and prepared salmon eggs. Minnows are prohibited.

## ◆ FLY FISHING

As a rule, with many exceptions, use dry flies for Rainbow and wet flies for Eastern Brook. Best patterns are usually hackle or hair. Use big flies (size 8) in most cases. Tapered leaders not lighter than 2X point. It is wise to have backing on your reel.

Most fly fishing for Rainbow is in lakes over shallow water, weeds, gravel bars. Fish slowly, let your fly sit motionless for a few minutes of each cast, with your line straight.

## ◆ TROLLING

For Rainbow, troll at least 100 feet of line. For Eastern Brook, troll on the bottom. The slower the trolling, the more effective, so take lots of time.

Most effective troll lures for Rainbow are small, active plugs or attractor spinners with bait. For Eastern Brook, troll worms or beef behind attractor spinners. Trolling flies, either with or without spinners, is very effective. Trolling a dry fly six feet behind a small float often works for Rainbow. Troll inshore, along the edge of the pitch-off. In the evening, troll very shallow waters. Gold or brass most effective colors.

## ◆ SPINNING

Most effective for Eastern Brook and Northern Pike but anglers must still learn to fish their lures after casting. Small spoons for Rainbow, small spoons or spinners with bait for Eastern Brook, large bright spoons for Pike. Usually these lures are taken deep. Float and bait good for Brookies. Float and a fly combination very effective at times.

## ◆ GUIDES

Fishing guides are licensed by the Parks Department. They are competent to help you catch fish but are not permitted to fish while guiding. They may be contacted through the above fishing tackle stores or the Jasper Park Lodge.

## ◆ FISH CAMPS

There are no camps devoted exclusively to fishermen in Jasper Park.

West of Jasper, in British Columbia along the Prince Rupert line and through the North Thompson Valley, a number of operators maintain fishing camps. We will be glad to recommend those which suit your purpose. Contact Sandy Scott in Jasper, Alberta.

RAINBOW TROUT FROM PATRICIA LAKE

## ◆ ACCESSIBLE LAKES

Small ponds 9 and 14 miles from Jasper town-site on the Edmonton Highway have been stocked and yield some trout.

**ANNETTE**—Poisoned in 1957 and now excellent fishing for Eastern Brook to two pounds. Flies or worms most effective.

**BUCK**—Eastern Brook Trout, Rainbow and Arctic Grayling. Not productive lately.

**CELESTINE** — Outstanding Rainbow Trout. Lake accessible by car over a very rugged one-way road. Fish average over three pounds and excellent scrappers. Shelter at the lake.

**EDNA**—Recently stocked with Arctic Grayling, please report any caught.

**DEAD MAN'S HOLE**—Very wily Brown Trout in this small pond near town. Good practice for spin casting. Water may be covered from shore.

**EDITH**—Rainbow Trout. Poisoned in 1958 but well stocked in 1959 with 10" trout. Fish the shallows. Fly fishing usually in evenings. Fishermen are highly visible to the fish in Edith so long casts are required. Cast ahead of the moving fish instead of directly to rise.

**HONEYMOON**—Poisoned in 1960 but should be ready to produce small trout this year.

**LEACH**—Poisoned in 1957. Very good in 1958, 1959 and 1960. Excellent "family" lake. Rainbow to 1½ lbs. Salmon eggs effective. Usually good fly fishing.

**MEDICINE**—Increasing numbers of Rainbow over 3 lbs., some Eastern Brook. Good fly fishing when conditions right. Troll bottom with spinners and bait until rises are seen. This lake rises and falls over twenty feet each season, so check local advice for its condition. Usually excellent in September.

**MINA**—Accessible by car over very rough trail. Poisoned in 1957. Eastern Brook to 13 inches.

**MOAB**—Closed to fishing since 1957.

**PATRICIA**—Rainbow to 6 lbs. and recently well stocked with Eastern Brook to 2 lbs. Best results for dry fly fishing or still fishing bait (worms or eggs). Fish near the automobile road. Fish late evenings.

**PYRAMID**—Lake and Rainbow Trout, Rocky Mountain Whitefish. In mid-summer, it is necessary to troll very deep for lakers. Excellent dry fly fishing for Whitefish late in June. Not popular with Rainbow fishermen. Spin fish from shore in June.

**SIXTEEN AND ONE-HALF** — Rainbow and Eastern Brook to four pounds. Excellent scrappers.

**TALBOT** — Northern Pike to fifteen pounds. Plug casting from shore along Edmonton-Jasper Highway about Mile 18. Bright spoons, feathered hanks, plugs. Use wire leader. Shallow water full of snags. Trolling from boat but casting is more effective. Recently stocked with trout as an experiment; please report any caught.

## ◆ LAKES AT JASPER LODGE

**BEAUVERT**—Fairly well stocked with Eastern Brook. Also big Rainbow, Pike, Splake, Lake Trout and Whitefish. The stream which drains into the Athabasca River sometimes offers sport. Limit five fish.

**MILDRED**—Excellent in 1958 for Rainbow and Eastern Brook, poor in 1959, and good in 1960.

**TREFOIL (First)** — Eastern Brook Trout chiefly but also hybrid, Rainbow and Lake Trout.

**TREFOIL (Second)**—Poisoned in 1957. Fairly productive in 1960 for shore spinning.

LAKE TROUT FROM PYRAMID LAKE

## ◆ EASY HIKES

**BEAVER** — Thirty minutes from Medicine Lake. Eastern Brook in all sizes. Usually very productive, particularly early in the season. Fly fishing, preferably wet, trolling spinners and bait, or bait casting. Good for spin casting with bait. Very shallow. Shelter for fishermen.

**CALEDONIA**—Twenty minutes from highway. Very productive of small, native Rainbow seldom over 10 inches. Dry fly fishing excellent. Troll small, bright plugs. Fish deep water to avoid under-size fish. Recommended as a "family" lake. Shelter for fishermen.

**HORSESHOE**—One hour from highway. Both Rainbow and Eastern Brook in quantity but usually small size. All forms of fishing. Trail crosses Hardisty Creek and offers some stream fishing.

**HIBERNIA**—Poisoned in 1957. Closed in 1959 and 1960. Splake to three pounds seen in 1960.

**MARJORIE** — Closed to fishing for 1959 and 1960. Splake and Eastern Brook. Fly fishing excellent on occasion. Trolling usually most productive.

**RILEY** — Forty-five minutes from road. Not very productive in recent years. Eastern Brook and Rainbow.

## ◆ HIKER'S LAKES

Don't measure miles on hikes in the mountains, measure time, for a mile uphill here is very different than a mile downhill.

**CHRISTINE**—Eastern Brook Trout, but needs additional stock. Good fishing from rocky shore for spin casting. Boats available.

**DOROTHY**—Rainbow, Brook Trout and hybrids. 14 lb. Splake taken in 1959. Most trout taken on bait.

**GERALDINE**—One hour from road. Very productive but high altitude means late spawning and lean fish. Good fly fishing from shore. Spin cast float and fly. The upper lakes are a tough scramble higher.

**HARDISTY**—Three hours tough hiking and trail not marked. Good Dolly Varden fishing but not recommended trip excepting with local companions. Small fish chiefly.

**IRIS**—Stocked in 1957 with Artic Grayling. Please report catches. Fly fishing suggested.

**MINNOW**—Ninety minutes from highway beyond Caledonia Lake. Very poor recently and not recommended. Rainbow Trout.

**SATURDAY NIGHT**—Two hours from highway. Rainbow. Good fly fishing when producing, but only small fish in 1960.

**VALLEY OF FIVE**—Two hours from highway. Rainbow and Eastern Brook. Fly fishing from beaver houses. Fly fishing and trolling from boat. Records show good results for spin casting.

## ◆ MAPS

In a booklet of this size, it is impossible to include maps of sufficient scale to show this 4,200 square miles of Park. The best maps available are those prepared by the Government on a scale of three miles to one inch, showing contours, mountains, lakes, streams, roads, trails and other details completely. These maps are 21-25 inches and two of them cover the entire Jasper Park area. They sell for twenty-five cents each and may be obtained from Sandy Scott, Jasper, Alberta, Canada, for that sum or direct from the Parks Department.

DOLLY VARDEN FROM LOWER MALIGNE RIVER

## ◆ STREAMS

Jasper's streams will disappoint you.

The most enjoyable form of angling is fly fishing a stream. However, in the mountains, the fisherman is faced with many conditions different than he is accustomed to on the plains and must adjust his tactics accordingly. For instance, most water is so turbulent that a dry fly is drowned almost immediately and it moves so fast that upstream casts are out of the question. However, with a little study of the problems, the fishermen will quickly modify his technique to the condition.

In July and August, usually, only the tributary streams in the Park are in good condition for fishing. The main rivers which drain glaciers are normally high and muddy excepting in Spring and Autumn. Most of the streams cross the automobile roads, so the fisherman can inspect their condition before he exerts himself. There are fish in practically all the streams. Our best advice is that when a stream looks good, fish it.

**ATHABASKA**—Parallels the main highway. Mostly Dolly Varden but also Rainbow, Eastern Brook, Rocky Mountain Whitefish and Pike. High and muddy in mid-Summer. Fish the mouths of tributary streams.

**ASTORIA**—Dolly Varden below the highway,

TO OUR PATRONS,  
OLD AND NEW:

A. W. (Sandy) Scott announces with pride and pleasure that he has acquired ownership of Dan Webster's Fishing Headquarters. "Sandy" wishes to assure all sportsmen visiting Jasper Park that they will receive the same high standard of service and information which has made Dan's name and store a byword in Jasper Park.

Rainbow above. Tonquin trail crosses river three miles above Edith Cavell road.

**BUCK**—Tiny stream draining Buck Lake and sometimes full of trout from the lake. Parallels main highway.

**COTTONWOOD**—Beaver dams about one mile above Pyramid Lake road. Rainbow and Eastern Brook Trout.

**BEAVER**—Drains Beaver Lake. Eastern Brook Trout mostly undersize excepting in Autumn.

**CALEDONIA**—Small, native Rainbow. Also fished between Caledonia and Minnow Lakes.

**FIDDLE**—Good pools and Rainbow fishing near road to Miette Hot Springs. Fly or fly and spinner. Upper stretches accessible by hiking from the Springs. Dolly Varden below Edmonton highway.

**HARDISTY**—Dolly Varden very plentiful. Best water between upper and lower trails from Athabasca Falls. Chiefly bait fishing.

**MIETTE**—Rainbow, Eastern Brook, Dolly Varden and Rocky Mountain Whitefish. Slow pools. Best water along road about 15 miles West of townsite.

**MALIGNE (Upper)**—Eastern Brook and some Rainbow. Excellent late in the season. Largest fish near the lakes.

**MALIGNE (Lower)**—Eastern Brook, Rainbow, Dolly Varden and Rocky Mountain Whitefish. Biggest fish at junction with Athabaska. Mostly fast water.

**MEADOW**—Rainbow plentiful but small. Fished from West Highway near Geike or in Tonquin Valley.

**POBOKTAN**—Rainbow. Best fishing near highway. Conditions never dependable but worth trying when water is right.

**PORTAL**—Dolly Varden. Best fishing from Portal-Tonquin trail. Chiefly bait.

**PYRAMID**—Rainbow below Pyramid Lake, mostly Eastern Brook above the lake. Small fish and conditions difficult.

**RANGER**—Rainbow and Eastern Brook. Fish down stream from highway to junction with river.

**ROCKY**—Dolly Varden, Whitefish and some

Rainbow. Mostly flat water below canyon with widely-spaced eddies.

**SNAKE INDIAN** — Dolly Varden and Rocky Mountain Whitefish in lower river accessible from Celestine road. Rainbow above falls accessible on pack trips.

**SNARING**—Rocky Mountain Whitefish to two lbs. very plentiful. Small Cahill flies, maggots or grasshopper bait. Eddies near highway. Small Dolly Varden.

**SUNWAPTA**—Eastern Brook and Rainbow. Usually high in mid-summer but some clear backwaters as at Mile 54. Good when water is right.

**TEKERRA**—Dolly Varden, Rainbow and Eastern Brook. Beaver dams and slow water about two-mile hike from Old Fort Point.

**VERDANT**—Rainbow to 14 inches in turbulent water. Three mile hike from Cavell road. Flies and grasshoppers.

**WHIRLPOOL**—Chiefly Dolly Varden. Good pools easily accessible from road to Moab Lake. Bait fishing.

## ◆ THE MALIGNE

In addition to being one of the scenic wonders of the Canadian Rockies, Maligne Lake and surrounding area offers outstanding Eastern Brook Trout fishing. Trips and accommodations are handled by Fred Brewster Rocky Mountain Camps and Maligne Tours. Special one-day fishing trips are arranged for parties of several people. To fish this area, it is advisable to spent at least one night. Accommodation ranges to \$14.00 a day with meals.

Some years fishing is so good in Maligne Lake that it produces 20 per cent of the catch reported for the whole Park. For one-day anglers it is advisable to have a guide as time on the water is very limited. According to water conditions early in the season most trout are within a mile or two of the chalets, moving up lake towards inlet streams as the season advances. Maligne Lake Brookies appear to be stabilized at slightly over one pound weight.

Camp grounds are located at Maligne Lake and the above operators will transport your equipment.

**LORRAINE LAKE**—About 45 minutes from the Maligne Chalets on foot or horseback. May be fished from shore by fly or spin casting. Boat available. Eastern Brook Trout to three pounds.

**MALIGNE LAKE**—Eastern Brook Trout to four pounds and occasional Rainbow. Boats recommended, power canoes available. Many trout taken in front of Chalets but recommended spots include Lousy Bay and Four Mile Point. Fly fishing successful but most trout taken trolling or casting attractors and bait.

## ◆ OVERNIGHT TRIPS

If you want to wet a line in water explored by few other anglers, we can arrange with outfitters in Jasper to take you by horseback far from automobile roads, deep into the primitive mountains where fishing often becomes too easy. The hidden lakes and streams of Jasper Park offer the outing of a lifetime.

You can be sure of your comfort, because Jasper outfitters give you the same service which has won them world-wide fame with big game hunters. Don't be afraid to take your wife and children along; they will enjoy easy daily rides and sleep at night on air mattresses. And the cost is comparatively small when balanced against the money you will spend otherwise for accommodations, meals and services. For slightly more than many visitors spend, the smart fisherman buys himself a special trip he will never forget.

**JACQUES STREAM AND LAKE**—Three days recommended. Nine miles by horseback from Medicine Lake. One of the easiest and most fish-producing trips in the Park. Dolly Varden Trout to five pounds. Bait casting, trolling and wet fly fishing. Recommended for June and early July.

**NORTH BOUNDARY**—Two weeks recommended. A different stream or lake and a different kind of fish every day. Waters include all types of fishing and more fish than you can possibly want. Snake Indian River, Deer and Blue Creeks, Adolphus, Topaz and Twintree Lakes. The camping trip of a lifetime. Advance arrangements necessary.

**SOUTH BOUNDARY**—Two weeks recommended. Accessible from Columbia Icefields, Maligne Lake or Rocky River. Variety of routes possible, leading past Brazeau Lake. All types of fishing.

**TONQUIN VALLEY**—Three days. Twelve miles by horseback from Cavell road or choice of two other routes. Amethyst and Moab Lakes yield Rainbow over 20 inches in profusion. Also

**BERLUND RIVER AREA** (Outside of Jasper Park)—Large Dolly Varden, Native Rainbow, Rocky Mountain Whitefish and Arctic Grayling in innumerable streams accessible from automobile road or hiking. Ask Sandy Scott.

# **ROCHE BONHOMME BUNGALOWS LTD.**

Two blocks off Edmonton Highway in Jasper Townsite. Three blocks from the shopping centre and hotels.

- Quiet But Convenient
- 21 Units — 15 with cooking
- Each Unit Equipped With Shower

## ◆ JASPER'S GAME FISH

**EASTERN BROOK (SPECKLED) TROUT**—Not Native but stocked in many of Jasper's lakes. Prefers to shelter under logs, snags or weeds. Will take dry or wet flies, usually in motion, spoons, plugs or bait. Best Brookie fishing last year was Maligne, Medicine, Beaver and Annette.

**BROWN (LOCH LEVEN) TROUT** — Very few left in the Park, notably Dead Man's Hole. Dawn and dusk appear the best time. Taken on flies, plugs, small spoons and bait.

**DOLLY VARDEN (BULL) TROUT** — Cousin to the Eastern Brook but native on the Arctic slope. Thrives in the glacial milk streams. In small sizes excellent eating. A good hole will usually yield a new fish every day. Will take streamer flies, spoons and plugs but most caught on bait. Best Dolly fishing last year was Athabaska, Whirlpool and lower Maligne Rivers, upper Portal Creek.

**HYBRID TROUT (SPLAKE)** — Cross between Eastern Brook and Lake Trout, fertile and Autumn spawning. Stocked in a number of Jasper lakes. Normally a bottom feeder and most caught on bait but it will take flies, spoons and plugs. Best Hybrid fishing last year in Dorothy and Honey-moon Lakes.

**LAKE TROUT** — Stocked chiefly in Pyramid and Moab Lakes. Usually a bottom feeder and in mid-summer seeks the deepest water. In early and late summer may be taken in shallow water by casting small spoons or bait. Most are caught by plugs or bait behind attractor spinners.

**RAINBOW TROUT** — Distributed throughout the Park and stocked in many lakes. Will take dry or wet flies, usually in slow action, spoons, plugs or bait. Strikes very hard and usually sets the hook itself. Best Rainbow fishing last year in Amethyst, Medicine, Celestine, Leach and Patricia Lakes.

**ARCTIC GRAYLING**—Not native to the Park but have been stocked in a few lakes. Seldom caught here on anything excepting flies, preferably dry, and often very selective. Good fighting and eating qualities.

**NORTHERN PIKE (JACKFISH)**—Native but not found in any of the landlocked lakes. Spring spawning, often school fish. Bright spoons or plugs, seldom taken on a fly. Average fish around four pounds but a few to ten pounds. Best Pike fishing last year was Talbot Lake and lower Athabaska River.

**ROCKY MOUNTAIN WHITEFISH** — Native and thrives in glacial milk streams. School fish, Autumn spawning. Very small, tender mouth. Will take small flies or such bait as grasshoppers, worms or maggots. Best Rocky Mountain Whitefish fishing last year in Athabaska, Lower Maligne and Snaring Rivers. Plentiful in Pyramid.
